White _82	Black _68	Smoke Grey _39
		
		Green Screen _33

† Chromablue and Chromagreen (1.35 and 2.72m width) and Green Screen (1.72 and 3.55m width) are special shades in the Colorama range, manufactured to achieve a colour as close as possible to Chromakey colours, within the limitations of paper manufacture.

†† Granite is suitable for use when 18% grey is required. Although every effort is made to ensure consistency of product, the paper production process may cause slight variations in colour. The texture and lighting of the surface can influence the final appearance of the colour.
